Date. 9. 5. 55

Call No. 522/170

PREFACE.

HAVING now printed CYCLIC TABLES of Hindu and Mahomedan Chronology, I have caused a Hindu Astronomer to frame the present volume, shewing the monthly and weekly notation for a century, beginning in A.D. 1751. The utility of such an Ephemeris to persons in business is obvious.

A volume on a similar plan was prepared under the directions of Mr. Reid the Registrar to the Court of Sudr Udalt in Calcutta: and brought down from A.D. 1764, to A.D. 1835. It gives only one or two days in a week and omits the lunar reckoning which is essential in Hindu dates. In the earlier part of the work, from A.D. 1764 until 1778 that volume is not always correct.

I will prefix the corresponding pages of the Cyclic Tables, with a brief explanation, referring the reader for further details to the preface to those Tables.

MADRAS,
20th April, 1850. }

C. P. BROWN.

EXPLANATION OF THESE TABLES.

The first column states the English date and day of the week. The second gives the Telugu year: with its name. According to the æra of Vicramaditya it has one numeral, used in Bombay: according to (S.S.) the Salivahana Sacam it has another numeral, used at Madras.

The order of Titles used in Bengal, at present precedes the Southern reckoning by eleven years. Thus A.D. 1850 is in Madras called Sadharana, the 44th Title. But in Bengal it is Durmati the 55th Title.

Each month is divided into the Bahula or Wane, and the Suddha or Bright fortnight. The lunar deviates from the solar reckoning: thus the same solar day sometimes includes the first hour of two lunar days. Hence some days are marked 12-13, &c. The last day of each lunar month is marked 30: which sometimes follows the 14th day or close of the fortnight.

A *tithi* or lunar day deviates from a solar day. For a *tithi* is that period during which the moon travels through twelve degrees of her path. It may commence at any hour or moment of the day or night. It is divided into a number of *gadiyas* or Telugu hours: of twenty-four minutes each. And there are from 54 to 66 such hours in a day, according to the length of the *tithi*.

Each lunar month has the *Sucla Pazam* (or Suddha) which is the bright half beginning with the new moon. The dark fortnight, or Wane, (called Krishna Paxam or Bahula) commences with Full moon. Each half contains fourteen days and the day of change. The names of the days will now be given.

Increase.		Decrease.	
Pádyami or new moon		Pádyami	1st
Vidiya	2d lunar day	Vidiya	2d
Tadiya	3d	Tadiya	3d
Chauthi	4th	Chauthi	4th
Panchami	5th	Panchami	5th
Shashthi	6th	Shashthi	6th
Saptami	7th	Saptami	7th
Ashtami	8th	Ashtami	8th
Navami	9th	Navami	9th
Dasami	10th	Dasami	10th
E'cádas'i	11th	E'cádas'i	11th
Dwādasi	12th	Dwādasi	12th
Trayōdasi	13th	Trayodasi	13th
Chaturdasi	14th	Chaturdasi	14th
Punuami or Purnami, that is, full moon.		Amāvasya, change.	

In the next column the Tamil date is given: deviating both in names and initial dates from the Telugu method. The days are reckoned not in lunations but regularly from one to 29 or 30. In the weeks the days agree, but bear different names.

In this column the year of the Kali Yugam is also marked.

The Fourth column gives the dates according to the style named from Collam (which we call Quilon) in Malayala.

The last column explains the date of the Hejri, used by Musulmans. Herein every (F) Friday is marked.

ON THE HEJRI, FASLI, VILAYATI AND SAMVAT.

The Musulman Æra named Hejri was introduced into the Indian Peninsula about A.D. 1600; and the Fasli reckoning cannot be discovered in any document earlier than A.D. 1650.

The Hejri system, which I have printed according to Warren's Tables, was clearly intelligible: but out of this arose the Fasli, or "harvest" which very probably was intended to suit the Hindu method. The year A.D. 1800 was Hejri 1215, but the Fasly year was 1209, being six years less. In 1850 it is seven years less.

The Hejri year, of 360 days is used only by Musulmans: who use no other method.

The Fasli is used solely by Hindu clerks in the East India Company's service. During the Musulman government the Fasly was loosely used: thus the year Krodhi (A.D. 1784) is Fasli 1193, but in some documents is 1194. The year Saumya (A.D. 1789) is numbered Fasly 1198; but in some places this becomes 1196, and elsewhere 1199.

About the year A.D. 1800 when the country became subject to the English, the Fasly year happened to commence on the 13th of July. Whereupon the English constituted that day as the beginning of the Fasly year: which hereby was metamorphosed into a solar reckoning: but devoid of months: being a mere official year. The Hindus at the present day (only the clerks in Government employ) quote the Fasly by the last two figures alone. Thus A.D. 1820 is called "Fasly Twenty-nine" (A.F. 1229); which it is the fashion to mention in Hindustani numerals: thus "Untis Fasly" means 1229. And Fasly 1239 (A.D. 1830) is called Untalis Fasly: that is, 1239.

Thus in Munro's Report (26th July 1807, Fifth Report p. 785) he speaks of the Survey rent in 1215 (meaning Fasly 1215, that is, A.D. 1806;) and 1217, 1218, meaning A.D. 1808 and 1809.

Among the Inscriptions and other documents collected by Mackenzie there are a few which state the Hejri date in Arabic numerical words. Thus (written in Canarese characters) sittu, sabaain alaf= $6 + 70 + 1000$ that is, A.H. 1076.

It appears that the "Vilayati" (Willaiati) and Sambat (Samvatsara) used in Bengal are nearly the same as the Fasli. Thus the First Regulation of A.D. 1793 is dated the "1st of May; answering to 21st of Bysaak (Vaisakha) 1200, Bengal æra; 21st Bysaak 1200 Willaity; 6th Bysaak 1200 Fusly: 6th Bysaak 1850 Sumbut; and 19th Ramzan 1207 Hegeree [5th Rep. p. 738.]

Tippoo Sultan wished to abolish the Hejri reckoning, calculated from the flight of Mahomed: substituting a new era reckoned from Mahomed's birth. He also wished to use the Hindu Cycle of sixty years: giving each year a new name; wherein the letters were to express the numerals, ten, fifteen, fifty-five and so forth. After awhile he again altered his plan. But the system did not survive its inventor. It is sufficiently explained in the Preface to Kirkpatrick's "Select Letters of Tippoo Sultan."

POSTSCRIPT.

The Compiler has requested me to publish the following notice regarding himself.

‘ Having now printed Cyclic Tables of Hindu and Mahomedan Chronology, I have caused a Hindu Astronomer, named Vencata Soobramanya Siddhanti, son of the late A’dishésa Siddhanti, a Hindu Astronomer employed in the College of Madras, to frame the present volume, shewing the monthly and weekly notation for a century beginning in A. D. 1751. The utility of such an Ephemeris to persons in business is obvious. A second volume has been prepared, extending to A. D. 1900.’

THE END.
